## BACKGROUND INFORMATION

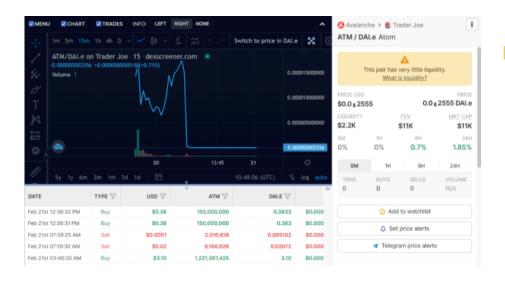

Atom Protocol was promised to be a high-yield node protocol with an extensive roadmap filled with items such as NFT's, P2E, DaaS & the creation of a DAO. Within 1 day of their launch, the project owners changed the token contract to disable investor's ability to sell their tokens & then drained the value out of the liquidity pool.

#### According an article by **Ambcrypto:**

The developers of this protocol posted a rather "polite" message on Twitter before deleting all its social channels on 20 February.

Soon after, its Discord channel was turned off too. Furthermore, the sale of its token ATM has also been halted, with the coin's price completely tanking on the charts.

The funds from the liquidity pool were transferred out to a personal wallet address, attempted to "wash"/hide & then partially withdrawn to a centralized exchange (CEX).

#### TIMELINE OF EVENTS

Project Launch: 2/19/22 10:12:58 PM UTC

## At ~6:00AM on 2/20/22

The token contract was changed to disable all sells

<< Missing transaction/contract confirmation>>

The responsible party minted **4,200,000,000 ATM** tokens via this transaction:

https://snowtrace.io/t/0xcf342a6d824a2107df6ed6a81160c1df8e826efcfe7d582257dc5649 3177193d

The newly minted tokens were sent to this address:

#### 0xa875a5170a3464debfc04aa4fd1aea903be40a5c

This address then sold the newly minted tokens into the **Trader Joe liquidity pool** and extracted **87440 DAI** via a series of **36** swaps shown below:

## **Summary of Tornado Cash Transactions/Analysis**

Given enough time between deposit/withdrawal, it becomes difficult to distinguish between inputs/outputs when looking at the Tornado Cash contract interactions.

However, in this case the responsible party used large transaction sizes (more easily identifiable) and also immediately withdrew after depositing. This makes it straightforward to link the inputs/outputs and keep the digital trail of funds intact. There are very few **500 AVAX** Tornado Cash deposits/withdraws. Tornado Cash is not used as heavily on Avalanche chain & the frequency of **500 AVAX** transactions is limited to **less than one per hour.** 

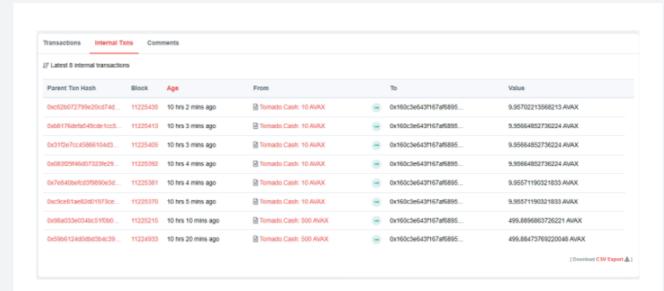

Take note of the timing of the transactions below.

When looking at where these two particular **500 AVAX** withdraws came out of Tornado Cash, they both went to the same address, **0x160c3e643f167af68956d1f8ea9af0e69e9ecab0**.

The transaction history for this particular address is as follows:

It should be noted that these deposits mirror the **Tornado cash** inputs from the **Atom Protocol** exit scam exactly.

All 1,060 AVAX that was deposited into Tornado cash from this event landed in this wallet.

A portion of the stolen funds (351.997 AVAX) have been withdrawn to Binance via the following TX ID:

https://snowtrace.io/tx/0x140f83477622bf2f4c7e4443d23ae639618f04cfd8369e483fedbee2c25b1c0f

The remainder of the stolen funds (706 AVAX) currently still remain in the following wallet: https://snowtrace.io/address/0x160c3e643f167af68956d1f8ea9af0e69e9ecab0

## RECOMMENDED ACTION ITEMS/NEXT STEPS FOR ADVERSELY AFFECTED PARTIES

**Contact Binance Support** with details of the alleged fraudulent activity and request that the account the stolen funds have been withdrawn to be **frozen immediately (Priority)** 

Details regarding filing support request with **Binance:** https://www.binance.com/en/support/faq/360000006051

File law enforcement reports with the following agencies:

Europol CyberCrime: https://www.europol.europa.eu/report-a-crime/report-cybercrime-online

AMF (French Financial Authority): https://www.amf-france.org/fr/signaler-une-arnaque-ou-une-anomalie

## **NEXT STEPS FOR ASSURE**

- Leverage blockchain forensics/investigative partners to perform a deeper analysis of the on-chain events & create formalized report
- Aggregate the information contained within this report & that provided by our investigative partners to complete a Formal Evidence Package
- Assure will provide guidance on additional appropriate jurisdictions & agencies to which injured parties can file reports
